## Transmissions

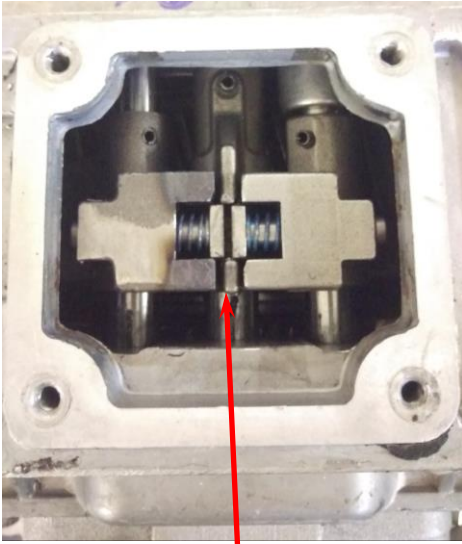

### STX TR-4050 REMOTE AFTERMARKET SHIFTER INSTALLATION INSTRUCTIONS

#### TO INSTALL STX REMOTE SHIFTER ASSEMBLY:

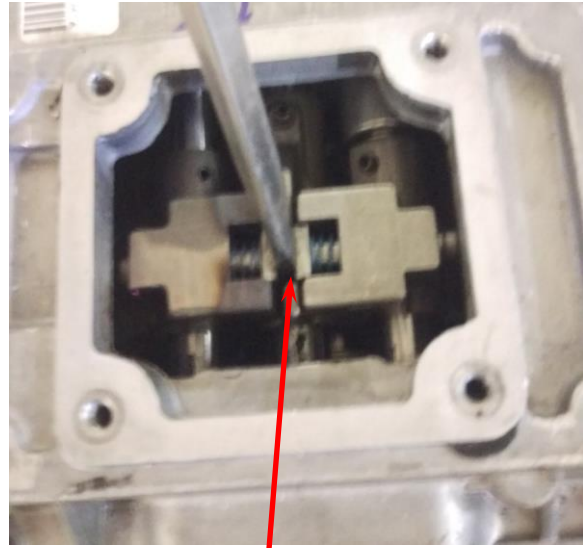

1. Place shifter of the TR-4050 transmission in 3<sup>rd</sup> or 4<sup>th</sup> gear.
2. Remove the 4 bolts attaching the original stock shifter assembly to transmission.
3. Remove the shifter from the transmission.
4. Run a bead of RTV silicone around the shifter mounting surface of the TR-4050.
5. Install remote shifter assembly to transmission – insert lower shifter stub into the shift dog.
6. Line up the shifter with the 4 bolt holes
7. Install bolts and torque to 11 ft-lbs (14Nm).

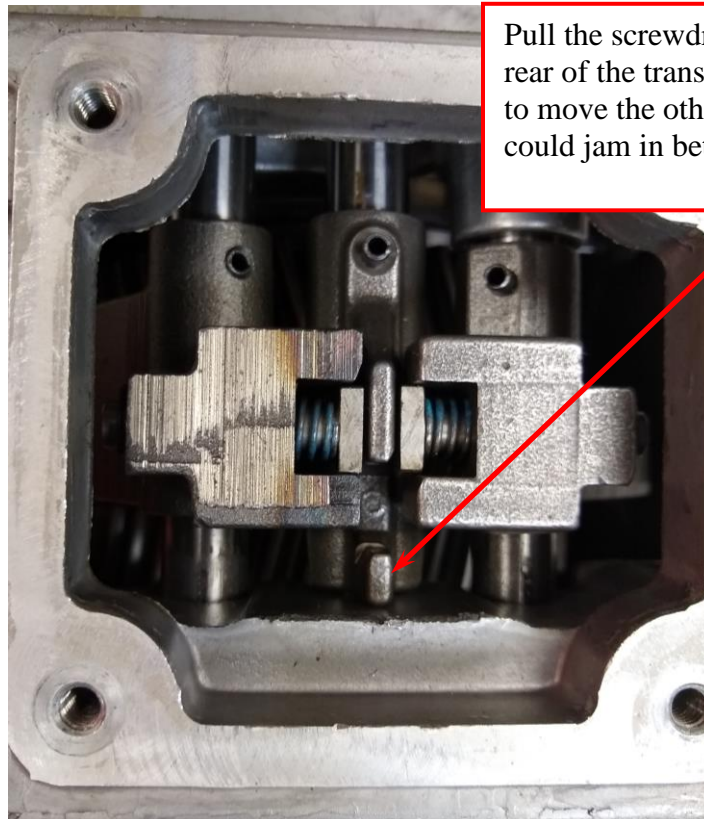

If you did not remember to put the transmission in 3<sup>rd</sup> or 4<sup>th</sup> gear before taking the shifter off, then follow the directions here;

Locate the center shift rail

Insert a long flat blade screwdriver in between the outside rail interlocks

Pull the screwdriver back towards the rear of the transmission. Be careful not to move the other rails, the transmission could jam in between gears.

Continue with step 3 on the first page.
